Evaluation Criteria Addendum

Prospective power providers have asked for additional information regarding application of the evaluation criteria. The evaluation criteria will be ranked as follows:

Criterion 3 (Pricing Approach) is the most important. Criterion 2 (Capabilities of the Offeror and Performance Record) and Criterion 1 (Technical Approach) comprise the balance of the evaluation, with Criterion 2 ranked higher than Criterion 1.

Regardless of this relative ranking, if the selecting official concludes that a proposal fails to acceptably satisfy any one of the criteria, that proposal may be disqualified from further evaluation.
